TALKING HARDWARE DATA

BRING OUT YOUR HARDWARE DATA'S FULL POTENTIAL

Rilheva Platform is an open technology allowing you to collect data cross market and cross product.

Then processing them and making them available simply through the Internet, the way you want: **via web, app or mobile.**

How it works

Any hardware Any data

All the power of the Internet of Things is now a platform able to collect all your hardware data.

Its name, **Rilheva Platform**: a cloud ecosystem which gathers all your hardware data and makes them available so your business can grow.

The more hardware data Rilheva Platform gathers, the more smart the ecosystem becomes: this way you optimize your processes and empower your core business.

1. **Create an account**
2. **Select the transmission technology**
3. **Configure the service**

Only 3 steps and your hardware data instantly begin to flow online into **Rilheva Cloud**.

Just a few clicks and your hardware data are live 24/7, always online and always available.

Many clients from many industries worldwide have already chosen **Rilheva Platform**'s many solutions to carry the data that generated by any hardware onto an innovative platform where you can process them and make them **available anytime, anywhere, to anyone**.
