

Remote hardware data cloud FTP aggregator

VOX *FTP*

Collect all your hardware data
and make them meaningful

HARDWARE DATA

Rilheva Platform is a cloud service that provides a breadth of services to transform your data into information.

UNIVERSAL

VoxFTP service allows you to collect data from any hardware that is able to capture them in a csv file and send them via FTP.

HASSLE FREE

Dedicate yourself only to the development of your hardware. Communication and data expression is ensured by VoxFTP.

EFFICIENT

VoxFTP takes your hardware to the cloud with total precision, without any trouble about control center management.

EASY

The file can be a simple csv excel (first column time stamp, from the subsequent data), without length limitations. Upon reception of the first file, you only have to define the "variable mapping" through a dedicated web interface.

Number of files managed:	unlimited
Maximum frequency receiving files:	1 per minute
Number of records in the file:	unlimited
Maximum number of columns in the file:	255
Management of historical data:	up to 5 years online

Management of alarms via SMS / email / voice / Apps
Access via the Web and Apps (iOS and Android)
Display in tabular form, graphics
Dashboard and map
Reports and Statistics
Mathematical combinations, KPI
