

WHO WE ARE

A leading European software automation company with an advanced IloT platform expanding operations in the US market. Xeo4 designed Rilheva Platform to cover the monitoring and control needs for SME/large companies with a turnkey solution that business into the IloT arena in hours.

#1 in time-to-market: less than 5 min to go live!

WHAT IS RILHEVA IloT PLATFORM

State of the art solution with validated in the European market that allows:

- securely access your devices from anywhere
- get alerts and control your processes
- share structured data with all your stakeholders

Rilheva it is the shortest path between you and all your data.

HOW IT WORKS

The advanced modular structure is designed to match clients changing needs with an easy setup process. With the choice of 15 different modules, your solution will be ready in no time without a single day spent writing code, creating virtual machines on Azure or testing after the integration.

The platform adapts by adding modules to an ongoing subscription with zero downtime, no analysis, and no need for new development.

BUSINESS MODEL

Subscription-based.

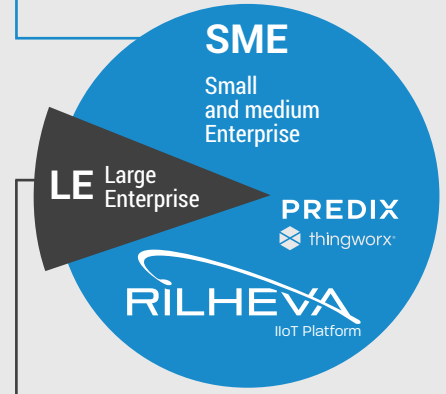

- Rilheva Platform is billed per monitored plant.
- The yearly subscription is priced depending on the enabled functionalities.
