## Rilheva & Ewon by HMS Networks

Rilheva and Ewon (Ewon is a brand of HMS Networks) make possible an IIoT solution that brings many key advantages:

1 **Zero time-to-market!**
The rapidity with which an enterprise can launch an IIoT solution is one of the primary reasons for selecting an IIoT vendor.

2 Associating **Ewon gateways** with **Rilheva** leads to a comprehensive solution that eliminates for the customer the need to deal with an extensive set of IoT vendors. Ewon gateways are sold and distributed, on behalf of the Italian HMS subsidiary, by the official Italian Distributor: **EFA Automazione SpA.**

3 **Rilheva Platform Management features** (i.e. audit, logging, …) in association with Ewon Device Management allows the customer to efficiently and effectively reconfigure platform components.

4 **HMS Networks** and **Rilheva** are recognized in their field for their deep domain expertise and insight within key industry and application areas.
